Professional Summary

Software Engineer specializing in ASP.NET Core, enterprise application development, and scalable backend systems. Experienced in building microservices, RESTful APIs, Angular front-end applications, and modernizing legacy enterprise platforms. Skilled in C#, SQL Server, Onion Architecture, CQRS, and cloud deployment using Azure. Passionate about clean architecture, maintainable code, and scalable software solutions.

Education

Computer Engineering — Yarmouk University (09/2019 – 06/2024, Irbid, Jordan)

Work Experience

Full-Time — Software Engineer | ISB & Unlimited-Innovation (11/2025 – Present, Riyadh, KSA and Amman, Jordan)

- Collaborate on enterprise projects for clients in Saudi Arabia alongside ISB Company (Jeddah, KSA)
- Develop scalable backend services and microservices using ASP.NET Core, C#, SQL Server, and Onion Architecture
- Implement API Gateway solutions using Ocelot and MediatR-based CQRS patterns
- Build and maintain Angular front-end modules integrated with .NET APIs
- Modernize legacy VB.NET systems by migrating them to EF Core, ASP.NET Core MVC, Web APIs, and Angular
- Develop and maintain enterprise solutions using the Laserfiche .NET Framework 4.8 SDK

Full-Time — .NET Full-Stack Developer | Servtech International (07/2025 – 11/2025, Amman, Jordan)

- Developed and maintained enterprise-level in-house applications using ASP.NET MVC, C#, and SQL Server
- Built Windows Services to automate exchange-rate synchronization processes
- Integrated AI-powered APIs for dynamic data mapping and business workflows
- Designed modular business components and reusable utilities in C# and JavaScript
- Created RESTful APIs for ERP and third-party system integrations
- Worked extensively with DevExpress components to build responsive enterprise UI modules
- Deployed and monitored applications using Microsoft Azure

Internship & Part-Time — .NET Full-Stack Developer | AppTrainers (12/2024 – 07/2025, Amman, Jordan)

- Developed applications including FoodTek, Computergy, and Password Manager

- Worked with ADO.NET, Entity Framework (Code First & DB First), and SQL Server
- Applied database design concepts including normalization, joins, stored procedures, and views
- Implemented JWT and OTP-based authentication systems
- Practiced Agile methodologies and RESTful API development

Technical Skills

Languages & Frameworks: C#, ASP.NET Core, ASP.NET MVC, ASP.NET Web API, Angular, JavaScript, TypeScript, HTML5, CSS3, SQL, DevExpress

Architecture & Concepts: Microservices, Onion Architecture, CQRS, RESTful APIs, OOP, Design Patterns, Repository Pattern, Agile Methodologies

ORM & Databases: Entity Framework Core, ADO.NET, LINQ, SQL Server, Stored Procedures

Tools & Platforms: Azure, Git, GitHub, Visual Studio, VS Code, Postman, Swagger, MediatR, Ocelot API Gateway, Laserfiche SDK

Projects

- **AloTax Website** — Corporate tax and financial consultancy platform based in the UAE offering VAT, Corporate Tax, audit, and financial consulting services.
- **Password Manager Website** — Secure password management platform built using ASP.NET Core Web API, Angular, and EF Core Code First.
- **Computergy E-Commerce Website** — RESTful API and Angular UI for an online computer store platform.
- **FoodTek Restaurant Application** — Backend services built using ADO.NET and SQL Server with RESTful APIs integrated with a Flutter frontend.
- **SIS University System** — University management system developed using ASP.NET Core, Entity Framework DB First, HTML, CSS, and JavaScript.
